

MEC 2001 Ltd

Environmental Policy Statement

The Directors and Management of MEC 2001 Ltd recognise that the activities of the organisation could have a significant impact on the environment. In order to minimise this impact, we are taking a proactive rather than reactive stance on environmental issues.

To this end, MEC 2001 Ltd have designated Care of the Environment as an essential part of the business strategy and planning/procedural matters. MEC 2001 Ltd would seek to support the Government's environmental aims by adopting, where possible, the best available techniques not entailing excessive cost.

It is MEC 2001 Ltd policy to:

1. Comply with all Legislation and Industry Standards with respect to the environmental issues.
2. Install a system whereby emissions to the atmosphere and egress of dust to the immediate area are progressively reduced.
3. Optimise energy efficiency and explore the use of alternative energy sources.
4. Progressively reduce the use of water through the eradication of any misuse of water.
5. Wherever possible to utilise waste products within the production cycle or for other constructive purposes.
6. Place environmental issues to the fore when considering the use of land.
7. Take into account the recycling possibilities when designing products and packaging.
8. Seek to use suppliers who have demonstrated a commitment to improving the environment.

MEC 2001 Ltd will take into account environmental issues when designing management systems, organisational structures and communication systems.

This Environmental Statement will be communicated to all the members of the organisation

IAN JACKSON
